

Dear *(insert name)*,

IZA, the International Zinc Association, in collaboration with zinc die casting associations, including *(name of local association)*, is organizing a 2018 competition rewarding the best castings made from zinc alloys. The Jury, composed of North American experts in pressure die casting, will judge the projects in terms of their design, quality, economy, ingenuity, and/or degree of innovation.

Our company *(insert complete name if appropriate)* would like to participate in this competition to contribute to the promotion of the benefits of zinc casting alloys and technologies as well as of our expertise in this area.

To do this, we would be very pleased to present the *(insert name of part/project)* that we developed in cooperation with your company. Indeed, we believe that this casting has all potential to be part of the candidates and, hopefully, be awarded in its category.

By participating, it is implicitly agreed that competition winners will be invited by IZA to present their project and be awarded during the 1st International Zinc Die Casting Conference – North America”, to be held in Chicago, IL on June 4-6, 2018. It is also requested that submitted projects may be presented as examples of application of zinc alloys in further promotional brochures published by IZA and partner associations and/or be included among the many other examples of applications on their website: www.diecasting.zinc.org.

We thank you in advance for the attention you will take at our request and remain at your disposal to provide you with any further information you might require.

Best regards,
